

# Working from Home with itrezzo and CiraSync

With more employees working from home, synced, current shared contacts and calendars on smartphones are needed more than ever. By guaranteeing accurate up-to-date access to this information on smartphones, companies can ensure employees may reach whomever they need and track important projects and meetings even when they are not in the office.

## The Global Address List Synced to Smartphones

An important part of transitioning to a remote workforce is ensuring that the company address book is available to these employees on their Outlook-enabled and smartphone devices.

The itrezzo and CiraSync solution are easy to use and require minimal IT or HR intervention. Once set up, these platforms will automatically sync to employee smartphones and other Outlook-enabled devices on a daily basis.

itrezzo and CiraSync allow employees to connect to whomever they need at a moment's notice, prioritize incoming calls, and access important company assets without needing to be in the office or in contact with IT.

"With CiraSync, there is no need to maintain tricky software. It was set up quickly and just worked perfectly from day one."

Dawid P,  
Senior Network Analyst, Illinois State Treasurer Office

## Shared Calendars on Outlook-enabled devices

Schools have found out that teachers require support from their smartphones and Outlook-devices while working from home to ensure their students meet their education goals.

Teachers require smartphone and Outlook access to shared calendars to track important staff meetings, parent-teacher conferences, and online lectures.

CiraSync and itrezzo support education by automatically syncing shared calendars to smartphones. This ensures that teachers will never miss an important staff meeting. Furthermore, these solutions allow teachers to coordinate with their students and their parents to ensure their students meet education goals and benchmarks.

"itrezzo is among my all-time top three software providers. Their support is very professional, quick, and capable."

Current User,  
IT Director

## Syncing Salesforce Contacts

Smartphones have become a valuable tool for sales and sales support teams. However, many don't have real-time contact updates from Salesforce and other CRMs.

As many companies transition to a remote workforce, syncing Salesforce and CRM contacts to employee smartphones and other Outlook enabled devices has become a necessity.

itrezzo and CiraSync can automatically sync CRM contacts from Salesforce directly to Outlook and on user smartphones. This allows employees to contact relevant personnel and track and contact sales leads even though they are not in the office.

"Every day, itrezzo syncs contacts of thousands of clients and suppliers to Outlook and smartphones of our sales team. The startup was painless, and it has been working flawlessly since."

John T,  
IT Director, Office Pavilion.
